DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d).

The certified copy has been filed in this application on January 23rd, 2004.

Information Disclosure Statement

The information disclosure statement filed January 23rd, 2004 has been considered by the examiner.

Drawings

The drawings filed on January 23rd, 2004, have been accepted by the examiner.

Examiner's Reasons for Allowance

Claims 1-3 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

As to claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious a method for the detection and evaluation of the light generated in a fluorescing specimen by a short pulse laser comprising recording specimen light in a wavelength dependent manner with **at least one nondescanned detector as a reference spectrum**, and carrying out separation into individual spectra during the irradiation of at least two fluorophores and/or self-fluorescing specimens simultaneously from the measured spectrum and the reference spectra through regression analysis, in combination with the rest of the limitations of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Additional Prior Art

Art Unit: 2877

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art made of record is Wolleschensky et al. (US Pubs 2003/0142292), Engelhardt (US Pubs 2002/0057430), and Stimson et al. (USPN 6,134,002).

Wolleschensky discloses a method for the detection and evaluation of the light generated in a fluorescing specimen by a short pulse laser comprising separately irradiating at least first and a second fluorophore with different wavelengths, recording a specimen light in a wavelength dependent manner with at least a scanned or a nondescanned detector, and determining the individual spectra of the fluorophores.

Engelhardt discloses a method for the detection and evaluation of the light generated in a fluorescing specimen by a short pulse laser comprising either using a descanned microscope or a nondescanned microscope.

Stimson discloses a method for the detection and evaluation of the light generated in a fluorescing specimen by a short pulse laser comprising either using a descanned microscope or a nondescanned microscope.

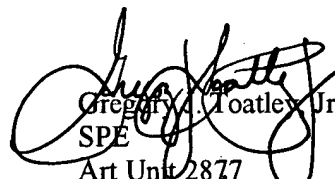

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kara E Geisel whose telephone number is 571 272 2416. The examiner can normally be reached on Monday through Friday, 8am to 4pm.
